

BoF: Data Science

CRAY

Discussion Questions

- **At your site, what types of data science workflows are people currently running?**
 - And what do they want to run?
- **What types of data science workflows do you think your site will be running in 2 years?**
 - How about 4 years?
- **Is your site interested in running workflows that combine elements of data science and traditional HPC/simulations?**
 - If yes, which workflow tools are you using/think of using?
- **How does your site want to run data science workloads?**
 - The Urika-XC model, with a single container and tightly integrated startup script that hides a lot of the complexity from users?
 - A more customizable micro-services container approach that allows more flexibility, but may be more complex to set up?
 - Bare metal?
 - Other?
